

# PYRAMID PANELS

## SPECIFICATIONS

### SIZING

Panels are sold in 3 sizes; **Small**, **Medium** and **Large**.  
Panel size is determined by the longest side of the panel.  
The panels do not have to be equilateral triangles.

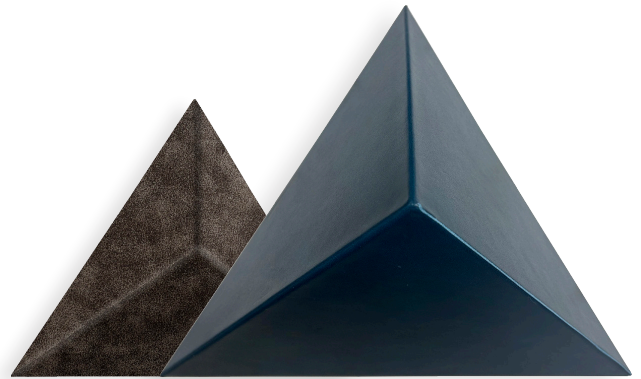

**Small** - Longest side can be up to 22 inches

**Medium** - Longest side can be up to 32 inches

**Large** - Longest side can be up to 42 inches

**Minimum Size** - 12 x 12 x 12 inch base, 2 inch height

**Maximum Size** - 42 x 42 x 42 inch base, 12 inch height

---

### PRODUCTION

Garrett Leather will provide drawings of each panel for client approval prior to production.

Pyramid panels are handcrafted using routed MDF and Garrett leather. Leather is fully wrapped around the base edges of the pyramid and secured along the back side with staples. A seam will appear along one of the top edges of the pyramid.

Leather exceptions include Wovens, Sheepskin and Saddle Leather. Nurtured By Nature and Impress patterns are not recommended. Patterns will not always align along the top seam edge of the panel.

Production lead time is 12-14 weeks, depending on the number of panels requested.

---

### INSTALLATION

Panels may be adhered to a vertical surface with either a Z Track system or Dual Lock.
