## FRONDS Etched

The graceful sweep of one of earth's oldest plants—Fronds adds air and texture at small and large scale applications.

Etched patterns are created on half hides using precision lasers. As a product of nature, each hide will vary in size and shape. Etched hide sizes range between 20 and 25 square feet (1.86 to 2.32 square meters) on average. Center cut hides size 50 inches x 70 inches (1270 mm x 1778 mm) are available for late applications. Lead time is 4 to 6 weeks.

Additional leather colors are available upon request.

Pattern at 100% scale

## TENDRILS Etched

Tendrils evokes air and water and wind with its elegant sense of gentle rippling movement.

Etched patterns are created on half hides using precision lasers. As a product of nature, each hide will vary in size and shape. Etched hide sizes range between 20 and 25 square feet (1.86 to 2.32 square meters) on average. Center cut hides size 50 inches x 70 inches (1270 mm x 1778 mm) are available for late applications. Lead time is 4 to 6 weeks.

Additional leather colors are available upon request.

DIS9001 Distressed Irish Cream

NAT050 Native Blackfoot

DIS9052 Distressed Anthracite

### Native

Italian natural grain, pure aniline leather, hand-buffed to create a rugged texture with a mottled appearance and beautiful depth of color. The matte surface of this natural, naked leather is unprotected and will highlight signs of wear with use. A rich patina will develop over time. It is ideal for those who admire leather in its purest form.

### Distressed

Light paraffin wax provides moisture resistance and antibacterial protection on these Italian natural grain, pure aniline hides. Color variations and natural markings are inherent characteristics of this leather, which will darken with use and patina as it ages.

### Journey

Each hide of this Italian natural grain, pure aniline leather develops a unique look that evolves as it is handled. Variations of light and dark areas come to life on the high gloss wax finish. The name pays tribute to the color migration that occurs throughout each hide as it is pulled or stretched.

Distressed Irish Cream Hive

Native Blackfoot Tendrils

Leather is a natural product that will age beautifully with prolonged use. Every hide is unique and may have variations in color and shading. Natural markings and signs of wear will be evident.

## HIVE Etched

Derived from the regular geometry of Honeycomb, Hive is an etched texture with a naturally-inconsistent pattern.

Etched patterns are created on half hides using precision lasers. As a product of nature, each hide will vary in size and shape. Etched hide sizes range between 20 and 25 square feet (1.86 to 2.32 square meters) on average. Center cut hides size 50 inches x 70 inches (1270 mm x 1778 mm) are available for late applications. Lead time is 4 to 6 weeks.

Additional leather colors are available upon request.

## HONEYCOMB Etched

Nature's maker space—Honeycomb is a geometric powerhouse enhanced through the depth of a consistent embossed pattern.

Honeycomb is embossed on half hides using a combination of heat and pressure. As a product of nature, each hide is unique. Hide size and shape will vary and color may darken during embossing. Hide sizes range between 20 and 25 square feet (1270 mm and 1778 mm) on average. Lead time is 2 weeks.

Additional leather colors are available upon request.

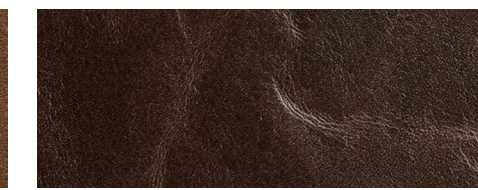

Pattern at 100% scale

## Available Colors for Embossing

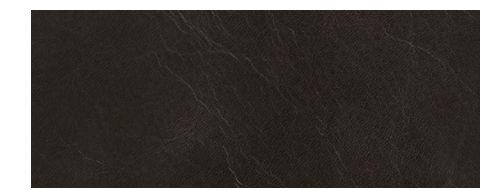

Select embossed Nurtured by Nature patterns on natural grain leathers with soft finishes that age to perfection like stones or wood worn by rushing waters.
